PROFESSIONAL SUMMARY

Bilingual Full Stack Developer and IT Support Specialist with over 3 years of experience resolving critical software, networking, and payment processing issues within international corporate environments. Hands-on experience diagnosing communication failures through data structure analysis and managing legacy systems. Currently combining formal technical training with building modern web applications using the React ecosystem, Node.js, and relational databases. Focused on writing clean code, optimizing workflows through AI tools, and delivering high-impact user experiences.

TECHNICAL SKILLS (STACK)

- **Frontend:** JavaScript (ES6+), React, Vite, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap.
- **Backend & Databases:** SQL (PostgreSQL), Supabase (Data Modeling), API Integration.
- **Tools & Environments:** Git, GitHub, Mapbox SDK, Salesforce, OpenCode (AI workflow with DeepSeek/Gemini).
- **Systems & Networks:** Legacy Systems Troubleshooting, Enterprise Network Configuration, POS Software Diagnostics.
- **Methodologies & Productivity:** Requirement Management in Notion, SCRUM / Agile Methodologies.

FEATURED DEVELOPMENT PROJECTS

Casa Martha Recovery — Medical Reservation Platform | *React, Vite, Tailwind CSS, Supabase, Mapbox SDK*

- Designed and deployed an Internal App optimized for international patient acquisition, implementing a hybrid booking workflow (human-centric via WhatsApp and automated).
- Integrated the **Mapbox SDK** with custom styling and geolocated pins to enhance user experience and navigation for foreign clients.
- Implemented a test environment for payment gateway integration using Lemon Squeezy for future transaction automation.
- *Project Link:* casa-martha-recovery.vercel.app

- **Project Documentation:** Created and managed an open development log on video platforms ([@wanna.dev](#)), sharing the architecture process, Mapbox SDK integration, and bug resolution with the developer community.

WORK EXPERIENCE

Movate (For Toast, Inc.) | *IT Technical Support & Payments Specialist*

September 2024 – March 2026

- **Software Diagnostics:** Analyzed and interpreted server responses via **JSON** objects using internal production tools to diagnose real-time communication failures and declined transactions.
- **Infrastructure Support (IT Support):** Diagnosed and resolved network outages, hardware misconfigurations, and connectivity issues for B2B clients (restaurants).
- **Legacy Systems Administration:** Managed the backend of legacy administrative platforms for menu reconfiguration, daily payment capture reconciliation, and financial report generation.
- **High-Performance Metrics:** Ranked in the **Top 3 support agents** globally, maintaining a First Contact Resolution (FCR) under 1 hour and keeping technical transfer rates below 10%.
- **Bilingual Communication:** Provided advanced technical support 100% in English, operating in both on-site and remote environments.

UnoPOS (PayRock) | *Customer Service & Technical Support Agent*

March 2026 – June 2026

- Managed POS software and hardware incidents using the administrative console tool (*Manager Console*).
- Facilitated client understanding of complex payment reports and operational audits within the financial and commercial sectors.

EDUCATION

Technical Degree in Software Programming

Servicio Nacional de Aprendizaje (SENA) | *In Progress (2026)*

- Core focus on programming fundamentals, data structures, entity-relationship diagrams, and relational database querying using SQL.
